

Contents

Papers

Mathematics

A Stochastic Inventory Model for Newsvendor-type Products with Two Warehouses SHAO Liang-feng (5150)

Geology

Analysis about Drill String Vibration of Horizontal Well during Side-drilling ... HAN Chun-jie, WANG Ying, YAN Tie(5140)

General Engineering Techuelogy

Test Time Algorithm for Reliability Verification Test of Scanning Components for Satellite-borne Remote Sensing Instrument YANG Yi(5144)

Mining Technology

Residual Stress Induced by Shot Peening and Processing Parameters Optimization HUANG Tao, ZHANG Tie-hu(5150)

Petroleum Industry Technology

The Effect of Interlayer Heterogeneity on EOR in Mid-low Permeability Reservoir CHEN Tao-ping, SONG Wen-ling, GAO Ming, *et al*(5167)

Instrumental Technology

Primary Discussion on Application of Rotometer with Combined Valve ZHANG Xia, ZHANG Xiao-wei, ZHU Hui-ren, *et al*(5158)

Communicational Technology

Field-emission Triode of Tetrapod-like ZnO Film Using Metal Mesh MA Li-an, HU Li-qin, GUO Tai-liang(5162)
The Design of a Miniaturized Bluetooth Printed Antenna QIU Jing-hui, LI Gao-fei, SUN Bo, *et al*(5167)
Remote-sensing Image Registration *via* Genetic Algorithm and Affine Transform ZHANG Bin, ZHOU Yang, CHEN Shu-wen, *et al*(5170)
Research on the Channel Estimation Algorithm for Optical-OFDM Based on MMSE REN An-hu, ZHAO Li(5174)

Computational Technology

An Improved Ant Colony Optimization to the Armed Logistics Network Survivability Analysis YU Shi-wei, LIU Wu-yang, CHEN Ying-wu, *et al*(5183)
Face Detection Based on Skin Color Model and Structural Features XIAO Hong, NAN Wei-zhi(5183)
A Novel Improved Approach to Eliminate the False Minutiae in Fingerprint Images LIU Ling-li, XIE Yan-jiang, LIU Xiao-ling(5212)

Traffic and Transpotation

Application of High Performance Concrete in Super Bridge Construction LI Zheng(5194)
Traffic Condition Fuzzy Recognition Based on Neural Network CAO Cheng-tao, CUI Feng, LIN Xiao-hui(5199)

Environmental Science

Research on the Effect of Shenzhen Mawan Power Plant Flue Gas Desulphurization Project on the Improvement of Regional SO₂ Concentraiton at the Atmosphere ZHUANG Yi-xuan, MEI Li-yong, ZHOU Xiao-zhou, *et al*(5204)

Research Notes

Mathematics

Two Results of Contain and the Gauss Function CHEN Bin(5206)
The Total Labelling Number of the Joint Graph of Path and Simple Fan MA Qiao-ling(5209)
Multiple Solutions for a Class of Singular Second-Order Four-point Boundary Value Problem with Sign Changing Nonlinearity LU Hai-yan, LI Qin, LU Hui-qin(5212)
The Existence of Positive Solutions for Second Order Differential Systems with Three-point Boundary Problem in Banach Space WANG Hai-ping, LU Hai-yan, LU Hui-qin(5215)
Periodic Solutions for Second Order Hamiltonian Systems with Impulses ZHOU Wen-yi(5224)
A New Class of Biased Estimation in the Restricted Linear Regression Model ZHANG Rui(5224)
An Hybrid Genetic Algorithm for Solving $L(2, 1)$ -Label of Graph CHU Yu-qing, QI Yi-fei, XIAO Li-shun, *et al*(5224)
The Discrete Population Model of China LIU Sai-yu, HUANG Guo-xiang(5229)

Geology

The Application of Strata Slicing in Recognition Deep Sublacustrine Fan-as an Example of Qingshankou First Section of Yingtaidaan Area in the North of Songliao Basin HU Yu-shuang, SUN Li-mei, YANG Zhi-hui, *et al*(5248)

Medicine

Comparison of the Dissolution Rate of Metformin Hydrochloride Tablets in Vitro from Six Different Pharmaceutical Factories LI Xue-mei, WEI Yu-ning(5235)

General Industry Technology

Deflection Analysis of Wooden Pallet in the Lifting Condition by ANSYS LIU Bao-peng, LU Jia-ping(5239)

Mining Technology

Design and Development of Advanced Mining Equipment Information System Based on SQL Server YANG Chen, WEI Jing-tao, WANG Ting-you, *et al*(5244)

Petroleum Industry Technology

Pressure Prediction Technology of the Deep Strata, Based on the BP Neural Network HU Quan-ming, JI Hai-peng(5248)

Relationship between Compressive Strength and Elasticity Modulus of Cement Stone under Monopodium Stress ZHANG Jing-fu, LIN Bo, WANG Xun, *et al*(5256)

Study of Fly Ash Composite Low-density Cement Slurry System LIU Qing-wang, CHEN Jin-qiu(5256)

The Lifting Adaptability Analysis of Small Displacement Screw Pump in Medium-deep Well ZHAO Kai-xing, HU Zhan-hong, XUE Jian-jun, *et al*(5259)

Instrumental Technology

An Automatic Adjustment Algorithm of Misalignment in the Infrared Interferometer YUAN Ya-fei, MAO Jian-hua(5273)

Cost-effective Piezoresistive Pressure Transducer ZHANG Tong-huai, GAO Zong-hai(5268)

Weapon Technology

Research on In-circuit Function Test Technique of PCB Based on Guarding Technique ZHENG Wei-zheng, WANG Yue-gang, WANG Xue-hao(5273)

Power Technology

A Study and Application of Optimization Layout for Central Heating System WANG Zhi-guo, WANG Jia-zheng, ZHANG Xue-lian, *et al*(5277)

Electro-Mechanical Technology

High Tension Electricity Reactive-load Compensation Apacitance of Condenser Group Zero Current Flow Balanced Protection Li Ying-bo, LI Gao(5280)

Communicational Technology

Implementation and Optimization of Mobile ERP System YU Xiao-rong, GUO Chang-yan, CHEN Gang(5286)

The Design of CDR Circuit Based on Virtex-II ... LIU Chun-mao, YANG Zhi-fei, WANG Xiao-pan, *et al*(5290)

The Simulation and Analysis of the Height Measurement Error Based on InSAR Point Target ZHANG Jian-qi, ZHAO Shu-qing, CUI Cen(5294)

Computational Technology

Design and Implementation of Temperature Measurement Circuit Based on CPLD GAO Yuan, LIU Hong-Yun, ZHANG Zheng-bo(5298)

The Application of Mill Stretch Auto Measurement for Steckel Mill SHI Qi-feng, ZHANG Chu(5302)

Serial Flash Memory Applied in Servo Drive Control System JIANG Yan-jun, CHEN Bao-guo(5310)

Orthogonal Basis with Signal Node over Cubic Spline Space WANG Wei, HAN Jing-li, WANG Guo-zhao(5310)

Light Industry Technology

Determination of Trace Cadmium in Leather by Polarography MA Ya-jun, WANG Rui-bin(5313)

Architectural Technology

Numerical Analysis of Energy Dissipating Low-rise Concrete Shear Wall Structure under Dynamic Loading Action SUN Ying, SHAO Dian-jie(5317)

Numerical Research on End Interfacial Stresses of RC Beams Strengthened with Prestressed FRP LU Fu-chang(5320)

Nonlinear Finite Element Analysis of Concrete Filled Steel Tubular Stub Columns Based on Micro-plane Model LI Shou-fang, ZENG Fei(5325)

Traffic and Transpotation

Design and Optimization of Cement Stabilized Aggregate Base and Its Evaluation of Anti-cracking Performance HU Zeng-lan, LI Qi-rong, ZOU Gui-liang(5329)

The Research about Porous Asphalt Pavement' Ventilated and Heat Dissipation Performance XIA Hui, ZHANG Xiao-ning(5339)

Single-wave Beam Guardrail Innovative Design and Application LI Jian-wei, LI Zheng(5339)

Study on Vehicle Delay Caused by Rail Traffic Construction FENG Qi-da(5342)

A Hybrid Control Method for Intersection Based on Automatic Classification of Traffic Intervals CAO Cheng-tao, LIN Xiao-hui, CUI Feng(5351)

Research of Traffic Demand Forecast in Traffic Impact Analysis WANG Guan-jun(5351)

Hydrodynamic Performance Prediction of Ducted Propeller Based on CFD OU Li-jian, AN Yuan(5356)

Managemental Science

Supportability Target Value Evaluation of Aviation Materiel Based on Similarity Theory ZHU Hua-yuan, CUI Ya-jun, Wang Wen-xiu, *et al*(5361)
